Malik Shahbaz Haider

PROJECTS

Tokens Management System for Emaar Customer Care (React Native Application)

- Constructed a comprehensive Queue Management System with efficient token handling, seamlessly integrated Printer SDK, and established interconnected systems for comprehensive monitoring.

Case Manager for Emaar Management (React Native Application)

- Developed a multifunctional project for Emaar Malls Group, UAE, with diverse modules (Check-List, Inspection, Incident).
- Highlight feature: dynamic HTML-to-PDF document generation, including image attachments, and seamless server uploads.

Valet Parking One for Emaar Customers (Android Application)

- Designed and revamped a versatile Valet Parking management system for Emaar Hospitality Group, spanning multiple locations.
- Encompassing Ticket Printing, Scanning, Car Parking, and Vehicle Receiving, with seamless Printer SDK integration for customer ticket generation.

Analog-One (React Native Application)

- This application is meticulously crafted to facilitate the seamless tracking of your daily activities and tasks, enhancing your time management skills.
- It offers similar features to Facebook, allowing you to easily connect with others by adding or removing friends, creating posts, adding photos or videos to your posts, leaving comments, chatting with friends, and forming groups.

Feed U (React Native Application)

- Created an intuitive restaurant account setup, allowing easy addition of menus, sub-menus, and prices for an enhanced digital presence.
- Crafted a user-friendly platform for customers to explore menus, order, and receive doorstep deliveries.
- Successfully introduced an efficient ordering system, ensuring timely food delivery and enhancing the overall dining experience.

Grabz (React Native Application)

- Seamlessly combined Sign Up and Login mechanisms, ensuring secure and personalized user interactions.
- Designed a user-friendly interface for seamless job listing creation and viewing, enhanced by a collaborative bidding system.
- Established a streamlined process from job initiation to secure online payment, optimizing user engagement and satisfaction.

Event Reminder (Android Mobile Application)

- Enabled user sign-ups, memory tagging with friends, and location-based curation. Implemented yearly memory reminders for celebration. Streamlined friend management and memory sharing, promoting connections and nostalgia.

Book My Car (Android Mobile Application)

- Designed intuitive Sign Up and Login, coupled with seamless Profile Setup, enhancing personalization. Created user-friendly interface for vehicle selection and efficient route mapping via Google Maps, streamlining bookings.
- Established point-based rewards, bolstering user loyalty through confirmed bookings.
