SUMMARY

Experienced Mobile Application Developer with a proven track record of creating successful applications over 4 years. Skilled in UI/UX design, testing, debugging, and crafting optimized solutions. Quick to adapt to new technologies, dedicated about continuous improvement, and experienced in the full software development life-cycle.

WORK EXPERIENCE

MOBILE APPLICATIONS DEVELOPER

Emaar Technologies | February 10, 2022 - Till Date   Dubai, United Arab Emirates

- Enhanced legacy systems, boosting user traffic by 60% through code optimization and architectural enhancements.

- Led the seamless integration of new modules into existing systems, enhancing functionality.

- Enhanced user experience with Firebase Analytics and Crashlytics integration, enabling data-driven decisions and error tracking.

- Facilitated efficient data sharing between two apps using deep linking techniques.

REACT NATIVE DEVELOPER

CitrusBits | July 5, 2021 - February 4, 2022   Islamabad, Pakistan

- Designed a robust React Native architecture for long-term support, prioritizing scalability and sustainability.

- Implemented Agile Scrum methodology to streamline project development and meet requirements efficiently.

- Conducted comprehensive manual and automated testing across various devices and platforms (Android and iOS).

- Played a key role in achieving a 50% increase in client usage following system delivery.

REACT NATIVE DEVELOPER

Echt Technologies PVT LTD | July 10, 2020 - July 3, 2021   Rawalpindi, Pakistan

- Collaborated effectively within a large team to conduct rigorous testing and resolve application issues, significantly improving performance by 60%.

- Successfully integrated various chat functionalities, including one- to-one and group chats, using getstream.io.

- Introduced a range of social features such as post creation, multimedia attachments, commenting, friends management, and birthday notifications.

- Implemented Sentry for crash tracking and Amplitude analytics for precise user engagement measurement, leading to an impressive 80% increase in user traffic.

ANDROID DEVELOPER

Eziline Software House PVT LTD | June 19, 2018 - August 19, 2019   Rawalpindi, Pakistan

- Summer internship: Built user-friendly Android app for memory organization, featuring media uploads, location tagging via Google Maps, and geofencing.

- Improved app stability by addressing errors and boosted user engagement with Firebase push notifications.

SKILLS

Programming languages: JavaScript (ES6) , TypeScript , Java , Swift
Frameworks / Libraries: React Native, Redux.js, Android Development , iOS Development
Development Tools: Android Studio, Xcode, Visual Studio Code, WebStorm
Quality Assurance and Project Management: Agile/Scrum Methodology, Jira, MS Teams, Slack
Code Versioning Tools: Git, Bitbucket, Azure Repos

PROJECTS

Tokens Management System for Emaar Customer Care (React Native Application)

- Constructed a comprehensive Queue Management System with efficient token handling, seamlessly integrated Printer SDK, and established interconnected systems for comprehensive monitoring.

Valet Parking One for Emaar Customers (Android Application)

- Designed and revamped Valet Parking management system for Emaar Hospitality Group, spanning multiple locations.

- Encompassing Ticket Printing, Scanning, Car Parking, and Vehicle Receiving, with seamless Printer SDK integration for customer ticket generation.

Analog-One (React Native Application)

- This application is precisely crafted to facilitate the seamless tracking of your daily activities and tasks, enhancing your time management.

- It offers similar features to Facebook, allowing you to easily connect with others by adding or removing friends, creating posts, adding photos or videos to your posts, leaving comments, chatting with friends, and forming groups.
